

Instructions for Indian Global Datafeeds
(Updated 6/8/2018)

1. Download AbleTrend software online,
https://www.wintick.com/files/setup_gdf.exe
2. Download Microsoft's .NET 4.7 version (for Windows 10, ignore this step):
<https://www.microsoft.com/en-us/download/details.aspx?id=55170>
3. When you open AbleTrend, click Advanced, select data module as "GDF".

The screenshot shows the 'Advanced' settings dialog box for AbleTrend. The 'Data Feed' section is expanded, showing the following fields:

- Choose your module:** GDF (selected in a dropdown menu)
- Username:** none
- Password:** masked with dots
- Server:** nimblestream.lisuns.com
- Port:** 4525

The 'Network Setting' section is collapsed, showing the following fields:

- Connect Through Proxy
- Proxy Server:** (empty)
- Port:** (empty)
- Proxy Username:** (empty)
- Proxy Password:** (empty)

4. Input your GDF key (you get from Indian Global Financial Datafeed Inc.),

server: nimblestream.lisuns.com

Port: 4525

Ignore all other fields, leave them blank.

5. Symbol format for GDF data:

<exchange>.<symbol>

For example: NSE.IOC

You may check symbols online <https://www.nseindia.com>

Please try symbol format like this:

NFO.OPTIDX_NIFTY_28JUN2018_CE_10800

MCX.FUTCOM_CRUDEOIL_19JUN2018__0
