

# How to be ***both*** right and sit tight!

Can you catch a big move in the early stage of the market trend ***and*** be able to sit tight, for the trade to reach its full potential?

The answer is yes! Here is the Award-winning trading software, **AbleTrend** that will prove it to you. You will ***never*** trade the market the same way again!

Trading can be learned, just as driving a car can be learned. With AbleTrend, trading can be made just as automatic and just as reliable.

This has been proved by tens of thousands of traders in more than 60 countries around the world. Whether you are trading the NY stock exchange, the London stock exchange, or the ones in Frankfurt, Singapore, or Shanghai, AbleTrend works. Only AbleTrend has won Stocks & Commodities magazine reader's choice awards, for three trading systems, 17 years in a row for Stock trading systems, futures trading systems and option trading systems.

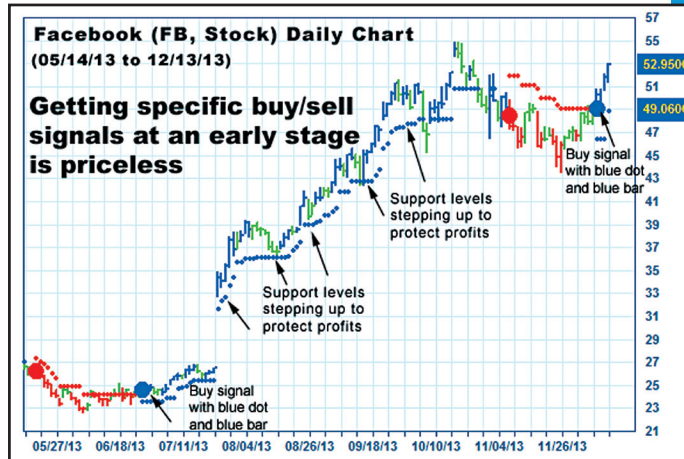

**No guessing! No fears! No management fees!** Our software selects the best potential stocks from 10K stocks daily, then AbleTrend autoscan monitors your stock watch list 24/7 and alerts you with time-tested buy/sell signals. And it's all under your complete control! You can do it, manage your own retirement account, and save!

**Be right:** you need to pick the right stock and take the position at the right time. Not too early and not too late. And never assume what the market will do. AbleTrend monitors your stock watch list 24/7 and will alert you with a timely signal as soon as it detects a trend change.

**Be able to sit tight** through market noise and let profits run without premature exits. AbleTrend protective stops show you the true market support levels throughout the trade, step by step, assuring you will stick with the winners till the market tells you to exit. Because you will know where the true market support levels are.

**Also, be able to sit tight** through market noise and let market tell you when a trend has started. Many times traders are anxious and are afraid of missing good opportunities, so they force a trade without having the market confirm the trend. Those arbitrary trades often result in losses. Once you have our software, providing you with plenty of great opportunities, you will never be afraid of missing trades again. You have the luxury to be picky in terms of selecting the right stocks at the right time!

Picture this to yourself! Tomorrow you open your stock charts - the same charts you've been trading with. You've made only one simple change to the charts by adding AbleTrend. It's so easy that your thirteen-year-old son could do it. Now, when you turn on the screen, a modern miracle of computing science comes to life under your control!
